

# College Inquiry Project

Research THREE (3) colleges or universities that interest you. One should embody a dream school that would be your ideal choice if money, admissions, and other practicalities were not an issue. The other two should be a realistic option given the realities of your life (in-state, Helena College).

Address the following criteria for your chosen schools in a Word document and save for final presentation and portfolio.

- Name of school and your program of interest (obviously the school should feature your chosen field of study).
  - Where is the school? Population of city or town?
    - Highlight two personal points of interest in regard to the city or town.
  - What is the population of the school?
  - What is the student-to-teacher ratio?
  - How much is tuition (in-state vs. out-of-state)? Total estimate with room/board and books per year?
  - Admission requirements-ACT/SAT scores, GPA, Application fee
- \*Any additional information you found to be interesting about your college choices
