

Name \_\_\_\_\_

The Fault In Our Stars-by John Green

Hazel, the main character in the book, has thyroid cancer. The thyroid is part of the endocrine system. Research the organs and tissues of the endocrine system. **List each gland/organ and what its function is and where it is located in the body.** Use the outline of the human body, include each organ of the endocrine system in the correct location as well.

What are some of Hazel's symptoms in the story?

Hazel says, "Cancer books suck." Do you believe this is a book about cancer? What were you expecting? Did the book meet those expectations?

What is oncology?

What type of treatments did Hazel have? Did they work?

What type of cancer does Augustus have? How is his cancer treated?

What are some of the drugs listed in the book?

Besides having cancer, what are some other conditions/illnesses that Hazel has as a result of her treatments?
